## Projects

**Wapilot**  **React 19, Vite, TailwindCSS v4, Axios, React Hook Form, i18next, ApexCharts**

### WAPilot – WhatsApp Automation Platform (Short Version)

Designed and developed a production-grade SaaS platform enabling businesses to automate and scale WhatsApp conversations through compliant, workflow-driven automation.

#### Key Contributions:

- Built an end-to-end WhatsApp automation system supporting campaigns, personalized messaging, interactive menu-driven conversation flows, and seamless human handoff.
- Developed a real-time campaign builder with contact segmentation, scheduling, throttling, and live delivery and reply tracking.
- Implemented rule-based automation (keywords, quick replies, office hours) combined with **GPT-powered AI replies** to handle both structured flows and free-text customer inquiries.
- Built a multi-agent support inbox with role-based access, chat assignment, and collaboration features.
- Integrated REST APIs and Webhooks for CRM/ERP/Zapier synchronization and event-driven messaging.
- Delivered analytics dashboards for open rates, response rates, and engagement insights.
- Optimized performance and scalability to support high-volume WhatsApp conversations with a responsive user experience.

**rasayl**  **next.js , shadcn/ui, tailwindcss ,zod,i18next , axios ,react-qwery, react-hook-form.**

A multi-role web platform designed to manage the entire study-abroad and visa application process. The system provides separate dashboards for each user type (Student, Agent, Institution, and Admin), ensuring a customized experience and secure role-based access. The platform enables students and agents to apply for academic programs and visa services, manage personal and educational profiles, and track application status in real time. It includes smart program filtering, approval workflows, and centralized admin control. A key feature is the Agent Management System, where agents can create and manage their own students, access a dedicated dashboard for each student, and perform all actions a student can do on their behalf. The platform also integrates a complete financial and commission system, automatically calculating platform fees and agent commissions, with secure balance tracking and withdrawal requests.

A platform that connects **companies and agencies**, similar to freelance marketplaces like *Khamsat*, but specifically designed to enable **collaboration between businesses and service agencies**.

It allows companies to **post projects and service requests**, while agencies can **submit their offers and detailed proposals**.

Once an offer is accepted, the system provides a **fully integrated communication environment** that includes:

- **Instant chat** between both parties.
- **Meeting requests and scheduling** capabilities.
- A **smart notification system** for alerts and updates.

The platform features **two dedicated dashboards**:

- An **agency dashboard** to manage proposals, projects, and client communications.
- A **company dashboard** to manage requests, review offers, and track project progress.

Multi-Tool Web Platform – Media & File Utilities

A web-based utility platform that offers a collection of interactive tools for media and file processing through a unified dashboard interface.

The platform includes an **image converter**, **advanced image editor**, **file compression system**, and **OCR tool for extracting text from images**.

The image editor provides core editing features such as **background removal**, **image cropping**, and **basic enhancements**, allowing users to quickly prepare and optimize images online. The platform is designed with a focus on usability, performance, and scalable modular architecture.

**Faturti – Multi-Vendor E-Commerce Platform**

**Overview** A multi-vendor e-commerce platform designed for wholesale and retail traders, enabling bulk sales, inventory control, and end-to-end order and business operations management.

**Key Features & Contributions:**

- **Advanced User & Role Management:** Phone-based authentication, data validation, duplicate prevention, and role-based access (Admin, Assistant Admin, Wholesalers, Retailers).
- **Multi-Tier Work Environment:** Granular permission system supporting management oversight, operational roles, wholesalers' inventory tools, and retailers' order tracking.
- **Product & Inventory Management:** Product categorization by unit and type, smart product suggestions, minimum order rules, and real-time inventory tracking.
- **End-to-End Order Lifecycle:** Complete order processing workflow from placement to fulfillment and status tracking.
- **Smart Pricing & Offers:** Flexible discounts, mixed discounted/regular items in a single order, automated price calculations, and minimum order enforcement.
- **Trader & Customer Network Management:** Business-based customer registration, trader accounts, activation workflows, and geographical area management.
- **Reports & Analytics:** Sales reports, purchasing behavior analysis, and business performance insights to support operational decision-making.

SKYS – Global Hotel Booking Platform

A full-featured hotel booking platform that allows users to search, compare, and book hotels worldwide. It includes advanced filtering, detailed hotel pages, and a multi-step booking wizard (guest details, payment, review, and confirmation).

The platform provides a complete user dashboard for managing profiles, reservations, favorites, and wallet features. It supports full multi-language functionality (Arabic RTL / English LTR) and is built with a performance-focused architecture. **I implemented and optimized the SEO system**, including dynamic metadata, structured data, sitemap generation, and Open Graph tags to improve search visibility and indexing.

## Education

**B.Sc. in Engineering, Misr Higher Institute of Engineering and Technology – Mansoura**
